Is It Time to Freshen Up Your Bathroom?

According to Reader's Digest, the average man spends 4 months (or 3,000 hours!) of his life in the bathroom reading. But compared to the 1.5 years (14,000 hours) the average woman spends in the bathroom, that seems like small potatoes. No matter which end of the spectrum you fall on, chances are you spend more time in your bathroom than you realize.

Why not make those hours more enjoyable by making a few tweaks to your current bathroom? **Here are some ideas:**

Install a Walk-In Shower

Walk-in showers are an elegant, easy to clean way to reclaim space in your bathroom and make your daily shower more luxurious. The absence of tub walls will also create the illusion of space and make your bathroom feel larger. This single change can transform the entire feeling of your bathroom.

Try a New Sink with More Counter Space

Installing a new sink with additional counter space can make getting ready in the morning a much more enjoyable experience. Whether you are fighting with your partner over space or just never seem to have enough, remodeling your bathroom to make sure you have enough space to lay out all you need can help your day start off as a simple, stress-free experience instead of a game of bathroom counter Tetris.

Optimize Your Cabinet Space for Additional Storage

Much like countertop space, it makes a big difference for everything to have a place in your bathroom. Freshen up your bathroom by reclaiming unused space and transforming it to useful cabinetry and storage spaces for everything you need.

Of course, the most important part of any bathroom remodel is choosing a remodeler that you know you can trust to communicate accurately and implement your vision in a timely manner. We would love to be the team that provides you with wonderful remodeling experience from start to finish.

Send us an email (just hit the reply button) or give us a call today to start the process of making the bathroom you dream of a reality.
